

<b>PRINCIPLES OF THE TRANSMISSION ELECTRON MICROSCOPE (TEM)</b>	<b>1-2</b>
History of the TEM.....	1
General Overview of the Electron Microscope .....	1
Analogy Between Electron and Light Microscopy.....	1
Photons/Electrons: Diffraction/Interference/Coherence/Resolution.....	2
Optics (Lens Theory).....	2
Electron Beams/ Electron Optics / Magnetic and Electrostatic Lenses.....	2
<b>TEM INSTRUMENTATION</b>	<b>2-4</b>
General References.....	2
A. Electron Gun .....	3
B. Condenser Lens .....	3
C. Objective Lens / Aperture / Specimen Stage .....	4
D. Projector Lens .....	4
E. Lens Aberrations .....	4
F. Camera and Viewing System.....	4
G. Vacuum System.....	4
H. Electrical System.....	4
<b>CONTRAST AND IMAGE FORMATION</b>	<b>5-6</b>
A. Depth of Field / Depth of Focus.....	5
B. Elastic/Inelastic Scattering .....	5
C. Phase/Amplitude Contrast / Contrast Transfer theory .....	5-6
<b>MICROSCOPE DISTURBANCES AND ALIGNMENT</b>	<b>6</b>
<b>OPERATION OF THE TEM</b>	<b>6-8</b>
General References .....	6
A. Choice of Voltage.....	6
B. Choice of Apertures.....	6
C. Specimen Stage .....	6
D. Choice of Magnification.....	7
E. Focusing .....	7
F. Magnification Calibration.....	7
G. Resolution Tests .....	8
H. Image Intensifier / TV Display .....	8
I. Microscope Maintenance .....	8
J. Photography.....	8
<b>OTHER MODES OF TEM OPERATION</b>	<b>9-12</b>
A. Electron Diffraction .....	9
B. Dark Field .....	9
C. High Resolution.....	10
D. Tilting and Stereo Microscopy.....	10
E. Electron Energy Loss Spectroscopy.....	10-11
F. Energy Filtering.....	11
G. Low Temperature.....	11
H. X-ray Microanalysis.....	12
<b>OTHER TYPES OF ELECTRON MICROSCOPES</b>	<b>13-14</b>
A. High and Intermediate Voltage .....	13
B. Scanning Electron Microscope (SEM) .....	13-14
C. Scanning Transmission Electron Microscope (STEM).....	14
D. Electrostatic Electron Microscope.....	14
E. Field Emission / Emission / Ion / Shadow / Reflection / Mirror EM .....	14
<b>SPECIMEN PREPARATION TECHNIQUES</b>	<b>15-20</b>
A. Specimen Support Grids.....	15
B. Specimen Support Films for TEM .....	15
C. Thin Sectioning (Fixation/Dehydration/Embedding/Staining) .....	16
D. Negative Staining.....	16-17
E. Metal Shadowing.....	17
F. Unstained Specimens.....	17-19
G. Freeze Drying/Etching/Fracture .....	19-20
H. Autoradiography.....	20
<b>RADIATION EFFECTS</b>	<b>21-22</b>
